

EDUCATION

B.E CSE - Sri Eshwar College of Engineering CGPA:7.5	2024-2028
HSC – BHARATIYA VIDHYA MANDIR MATRIC HR.SEC SCHOOL 79%	2022-2024
SSLC - SHANTHI NIKETAN MATRIC SCHOOL 75%	2020-2022

INTERNSHIP

MERN Stack Developer – Better Tomorrow March 2026

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js
- Built real-world projects with authentication, database integration, and responsive user interfaces.
- Designed and integrated RESTful APIs, implemented CRUD operations, and optimized application performance.

Full Stack Developer – EFIQ Solutions May 2026 -Present

- Developed and maintained web applications from development through deployment
- Managed full-stack debugging and optimization, delivering seamless user experiences across multiple projects.
- Assisted in deployment workflows, production issue resolution, and application maintenance.

PROJECTS

THIRAN – Production-Scale Event Management Platform

Built a production-ready event management platform to handle registrations, participant engagement, and operational workflows for a large-scale technical event. Implemented a React-based frontend, Node.js/Express backend, and MongoDB database. Deployed the application to a cloud/server environment, configured SSL/TLS certificates for secure HTTPS access, and handled monitoring, debugging, and production maintenance to ensure reliable operation during periods of high user activity.

HustleGuard AI — Parametric Insurance Platform

Built and deployed HustleGuard AI, a cloud-ready InsurTech platform leveraging Next.js, FastAPI, PostgreSQL, Celery, Redis, Docker, and machine learning. Engineered real-time data ingestion pipelines, asynchronous background processing, automated claim workflows, fraud detection systems, and dynamic risk-based pricing models. Designed scalable microservice-friendly architecture with containerization, environment-driven configuration, fault-tolerant API integrations, monitoring and logging capabilities, CI/CD-ready deployment pipelines, and production-grade reliability practices suitable for high-volume distributed systems.

RescueIQ — AI-Driven Food Waste Reduction & Intelligent Redistribution Platform

Designed and developed RescueIQ, an AI-driven food waste reduction platform that predicts surplus food and intelligently redistributes it to NGOs through automated matching and geospatial logistics. Built a full-stack architecture using React, FastAPI, PostgreSQL (Supabase), XGBoost, and Ollama. Implemented JWT authentication, role-based access control, real-time mapping, live location tracking, NGO discovery, NLP-powered donation creation, environmental impact analytics, automated prediction pipelines, and scheduled model retraining. Integrated cloud database infrastructure, connection pooling, health monitoring, and mobile deployment support to create a scalable, production-ready solution.

CERTIFICATES

Mastering Data Structures & Algorithms using C and C++ | Udemy Basics
SQL(Advanced) | Hackerrank
Oracle Java Course | Oracle
Introduction to Gen AI | IBM

CODING PROFILES

Leetcode : Solved 155+ problems | [link](#)
Codechef : Problem Solver - [Bronze Badge](#)
Skill Rack : Solved 900+ problems | Received 8+ certificates | 300+Bronzes |Rank-29231| [link](#)

SKILLS

Programming: C | C++ | Python | SQL | JAVA | JavaScript | KOTLIN
Technologies: React.js | Node.js | Express.js | Django | Spring-Boot | REST APIs
Databases: MySQL | MongoDB
Cloud & DevOps: AWS EC2 | AWS S3 | AWS IAM | AWS VPC | AWS EBS | AWS CloudWatch | Linux | Docker | Git | GitHub
Networking : TCP/IP | DNS | DHCP | HTTP/HTTPS | SSL/TLS | Subnetting | Routing & Switching | Load Balancing
Tools: VS Code | Postman | MongoDB Compass | MySQL Workbench | Cisco Packet Tracer | Docker
Concepts: CI/CD Pipelines | Containerization | Infrastructure as Code (IaC) | Monitoring & Logging | SDLC | Version Control
